# About Us

- Vending machine business born after diversification of other family owned business.
- Started experimenting by importing machines in 2000 and then own manufacturing after R&D from the year 2006, through older company.
- Only domestic manufacture and supplier at the time with major market share.
- Supplied few thousand machines in the Indian market from 2006 to 2015 through this company.
- Exclusive tie up with foreign partner company in 2015 to supply own brand of highest quality machines and support large quantities of 2000-3000 machines a year. As a result of this Vendstop was born.
- Shifted main manufacturing overseas completely in 2017, with certain assembly and customization being done in India.
- Have supplied over 2000 machines since then, in the Indian Market.
- Setup own base in Dubai, UAE in early 2022 to cater to Middle Eastern market

# Why Vendstop

- One stop shop for all vending needs.
- Modern & sleek design machines for simple operations.
- Upgrading with time.
- Minimal maintenance cost due to excellent quality of machines.
- Nationwide presence with service & support.
- 24/7 availability of service over phone for troubleshooting.
- Customized vending machines for specific projects.
- Wide range of machines with cash and cashless payment options.

# Our Capabilities

- Tools Vending machine for factories where employees can vend tools and consumables items from the machine, automating the process of reporting and tracking of each tool used by specific employee. This leads to reduction in wastage of inventory while saving cost.
- We are offering machines dispensing perishable and hot products like samosa, puffs, idli etc. where the temperature is about 45-50 degree Celsius.
- Other range of machines include elevator/lift and conveyor belt machines for dispensing sensitive items such as milk pouches, glass bottles, packed pastries, etc.
- We also involve into projects by teaming up with food and beverage brands to strategize and launch their products through vending.
- We can design and manufacture customized machines as per the customer's requirements.
- All our machines can accept digital payments, smart card payments, cash payments, etc. through popular third party systems available in India and worldwide.
